Key Insights & Recommendations

Summary of findings: 1,470 employees, overall attrition rate 16.1% (fictional IBM dataset)

Key Findings

- Overtime is the strongest signal: 30.5% attrition with overtime vs 10.4% without. Sales employees working overtime reach 37.5%.
- Early tenure is high risk: 29.8% attrition at 0-2 years vs 8.1% beyond 10 years.
- Low pay matters: 28.6% in the lowest income bracket vs about 10% in the top two.
- Poor work-life balance and low job satisfaction stand out: 31.3% (Bad work-life balance) and 22.8% (Low job satisfaction).
- Frequent business travel (24.9%) and long distance from home (20.7%) are linked to higher attrition.
- Hotspots: Sales Representative (39.8%) and employees under 25 (39.2%).

Recommendations

- Review overtime workload, especially in Sales, and track overtime hours as an early warning indicator.
- Strengthen onboarding and mentoring during the first two years.
- Benchmark pay for the lowest income bracket and high-attrition roles such as Sales Representative.
- Offer flexibility: hybrid work options, travel limits, and commute support for employees living far away.
- Run regular satisfaction and work-life balance surveys, and follow up on low scores.

Note: findings show association, not causation. Some groups are small; see tooltips for group sizes.
